Drag and Drop stories from Product backlog to Spring backlog

For each story enter the estimates, priorities and other details including assigning each story to one of the team members.

Estimates are essentially story points which say the amount of effort needed to get that work done. A guideline to be followed when estimating story points are:

Effort in hours	Story points
4	1
8	2
12	3
16	4
20	5
24	6
28	7
32	8
>32 hours effort means split that story in two smaller stories
